## **APEX COVANTAGE ACQUIRES SOFTWARE TECHNOLOGY COMPANY**

### ***Acquisition Bolsters Apex's Technology Products and Services Group***

**HERNDON, VA – January 28, 2010** - Apex CoVantage, a leading global knowledge process outsourcing (KPO) provider, today announced it has completed the acquisition of Wysitech Inc., a privately-held software technology and workflow consulting company. Headquartered in Dayton, Ohio, Wysitech's core capabilities combine fundamental engineering principles, leading edge technologies, and in-depth technical expertise.

Apex first collaborated with Wysitech in 2007 to enhance ProField™, a mobile inventory and asset management system that remotely manages widely-dispersed multi-vendor teams. A web-based application that allows a telecom or utility company to monitor all the activities of a field collection project, from the training of the technicians to the data collection activities in the field through to quality inspection, ProField yields up to 50 percent higher productivity and 20 times higher data quality. To learn more about ProField, visit [www.apexprofield.com](http://www.apexprofield.com).

“One of the reasons we were attracted to Wysitech is that they share our commitment to quality and customer-focused service,” said Apex President Shashi Gupta. “By partnering with Wysitech, we gain a deeper pool of proven software development and management professionals to better serve our customers. We are confident that Wysitech's success and solid customer base will be the catalyst for Apex to further expand our technology products and services portfolio.”

### **About Apex CoVantage**

Apex CoVantage is a private, employee-owned company that for more than 20 years has helped businesses to develop and execute strategies in the information and knowledge fields. Based in Herndon, Virginia, Apex was a pioneer in the market for off-shore knowledge-based solutions; we now have over 2,500 employees here and abroad. From the beginning, Apex specialized in developing and improving man-machine processes that optimally combined human creativity with machine processing efficiency, sometimes finding transformative solutions leading to quantum gains in efficiency—often well beyond what clients thought possible. For more information, please see our website at [www.apexcovantage.com](http://www.apexcovantage.com).
