APEX'S NEW FIELD ASSET MANAGEMENT TECHNOLOGY: PROFIELD™ GENERATES BUZZ AT ESRI INTERNATIONAL USER CONFERENCE

ProField Reduces Time to Market, Increases Profits and Improves Provisioning Efficiency

HERNDON, VA – September 3, 2008 – Apex CoVantage, a leading global knowledge process outsourcing (KPO) provider of engineering solutions, announced the successful debut of ProField™, its new field asset management technology, at the 28th ESRI International User Conference, August 4-8 in San Diego, CA. ESRI designs and develops the world's leading geographic information system (GIS) technology.

Creating unprecedented value for telecom, cable, gas, water and electric utilities, ProField integrates GPS wireless communications and GIS mapping with a mobile work force management system to provide a complete, turnkey solution for inventorying and managing outside plant assets. This solution reduces operating costs by accurately accounting for equipment and other assets in the field, and efficiently managing it.

“As an authorized ESRI business partner, this was an ideal conference for us to showcase the breadth and depth of ProField. ProField is a proven solution designed to improve the quality and efficiency of field infrastructure inventory and asset management for any organization responsible for assembling, training, deploying and managing a large-scale field force,” said Apex Engineering Solutions President, Greg Retzer.

###

About ProField

ProField™, from Apex CoVantage, provides easy, automated tools for training, deploying and monitoring a multi-crew field force. With five levels of quality assurance, ProField ensures that your contracted field force consistently performs to your highest standards. From inventory to asset management, only ProField enables 50% productivity gains and 20x quality improvements.

About Apex CoVantage

Apex CoVantage is a US provider of global Knowledge Process Outsourcing (KPO). Apex helps businesses to execute precise knowledge, information and communications strategies through our diverse people, technology and workflow systems. We opened our first KPO service center in 1988 and subsequently pioneered the market for offshore, knowledge-based solutions. Today, we provide publishing, contact center, engineering, and research and content solutions from a global network of state-of-the-art facilities with US-based project management and leadership. In every industry, our clients are reaching the next level of service performance in partnership with Apex CoVantage.
